

## Superplasticizer pce with best price

Superplasticizer pce with best price is a kind of powder form polycarboxylate ether superplasticizer manufactured through optimizations of molecular configuration and synthesis process. It is suitable for cementitious mortars with requirements of high fluidity and high strength.

Superplasticizer pce with best price can impart mortar high liquifying effect, easiness of defoaming and, long time retaining of those properties. It is of excellent compatibility with various kind of cement binder and other additives, such as defoaming agent, retarder, expansive agent, accelerator etc.

### Quality Specification

Item	Unit	Standard
Appearance	/	White powder
Density(23°C)	Kg/m <sup>3</sup>	500 ± 50
PH (23°C)	/	6.0 ± 1.0
Solid Content	%	97.0 ± 1.0
Moisture content	%	≤ 3.0
Water Reducing Ratio	%	≥ 25

Cl-	%	$\leq 0.02$
Alkali content	%	$\leq 0.3$

### **Product Characteristic**

1. High water reducing rate
2. Early strength and high strength
5. High durability
6. Green environmental product

### **Fields of Application**

Main used in ready-mix dry mortar. It includes: cement and no-shrinking self-leveling floor, contentious no-shrinking grouts, pile pressure grouts, emery sand wear resistant floor. Also, it can be used for high fluidity self-compacting concrete etc.

### **FAQ:**

Q: Can you provide samples ?

A: The confirmation of samples is a necessary part of our cooperation, welcome you to ask for samples for us. We can provide samples to customers for free.

Q: Do you test all your goods before delivery?

A: Yes, we will carefully test the products before delivery, and we will also test the products for application test. It is our advantage to test the products for application test before delivery, which ensures that the products delivered are 100% qualified.
